Objective

As a passionate and driven Master of Computer Application (MCA) graduate, I am dedicated to leveraging my comprehensive understanding of computer science principles and advanced technical skills to contribute effectively to innovative projects and solutions. With a solid foundation in programming languages, software development
methodologies, and database management, I am adept at tackling complex challenges and delivering high-quality
results within deadlines

Proffessional Skills

MongoDB, Express JS, React JS, Node JS
,Next JS, Tailwind CSS, Bootstrap , HTML,
Java , JavaScript , C, C++, SQL, CSS

Internship

MERN Stack Development (2023)

- SOFTZANE SOLUTIONS, Kollam, Kerala
- 6 months of experience as a Full-Stack Developer.
- Employed technologies such as MongoDB, Express.js, React.js, and Node.js to develop and maintain web applications.
- Collaborated closely with cross-functional teams to design and implement new features, enhancing the overall functionality and user experience of the applications.
- Actively participated in code reviews and implemented best practices to ensure code quality and maintainability.
- Contributed to the successful delivery of multiple projects, meeting tight deadlines and exceeding client expectations.

Projects

ONLINE LEARNING PLATFORM

- Built a comprehensive online learning platform where instructors can upload courses and students can enroll in them.
- Integrated features such as video streaming, quizzes, progress tracking, and user profiles, providing a holistic learning experience for users.

FLIPKART CLONE USING REACT

- Developed a full-featured e-commerce application mimicking Flipkart's functionality using React.
- Implemented key features including product listings, shopping cart, user authentication, payment gateway integration, and order management.

ENHANCED PASSWORD PROCESSING

- Developed a robust password processing system leveraging Visual Cryptography (VC) and Optical Character Recognition (OCR).
- Implemented strong protection mechanisms against cyber-attacks by encoding images with a SEED number, ensuring enhanced security and data integrity.
